## SCIENCE

This series from Mad Science is designed by you—the Inventor! Each week you’ll be given a series of challenges which must be overcome using basic materials, simple machines, tips from world famous inventors and the most important thing of all – your mind. If you were stranded on a desert island how would you survive? You would need to build shelter, find food and purify water, protect yourself and your teammates from the elements and find a way off the island. Journey to the future and examine the ultramodern inventions of the 23rd century, and design the future - today. "Create" mini light sabers, “green energy”, and hovercraft. With a bit of ingenuity, construct catapults and forts and then lay siege, fabricate a winning Egg Drop design, construct a dancing robot and experiment with a Salt Water Fuel Cell Car. While Thomas Edison said invention is 10% inspiration and 90% perspiration, this session is 100% fun!
